

# RECYCLING BINS

To enhance or help you start your business recycling program, The City of Woodland Environmental Services Division is offering the following free bins, available while supplies last.

## 28 Quart Desk-Side Recycling Bin

This recycling bin is ideal for office recycling. It is designed to fit beside or underneath a desk. Adding a recycling bin next to each desk-side trash bin helps promote recycling and discourage contamination.

## 23 Gallon "Slim Jim" Recycling Bin

This bin is tall and slim, making it efficient for small and tight spaces. It serves as a convenient bin for collection of recyclables in common areas, with enough capacity for high traffic areas. Available with or without lids and signage.

## 32 Gallon Round Recycling Bin

This is a classic round bin with sturdy handles to make disposal simple. The 32 gallon capacity allows for collection in large volumes. Great for high traffic areas or janitorial collection of smaller recycling bins. Available with or without lids.

CITY OF WOODLAND

In addition to these recycling bins, the City of Woodland is offering **free site visits** to assess your recycling program and **free presentations** to help your employees understand the requirements to recycle.

If you would like any of these resources, visit [cityofwoodland.org/recycle](http://cityofwoodland.org/recycle) to apply online. For any questions, please contact City of Woodland Environmental Services at (530) 681-9212.

# RECYCLING TIPS

Make your recycling program successful with these helpful tips.

1

Place recycling bins and trash cans in pairs, so recycling doesn't end up in the trash or vice versa.

MIXED RECYCLABLES

Clearly label recycling bins. Indicate acceptable materials with signage above the bins, if applicable.

2

3

Skip the bags for your recycling bins or use clear bags, so recyclables are not mistaken for trash. Informing janitors of your new program and set-up will also increase recycling success.

Consider janitorial needs when selecting recycling bins. Janitors may require larger bins to collect large volumes of recyclables.

4

5

Educate your employees and prepare them for participation in your recycling program. Employees are the key to a successful recycling program. Free presentations are also available.

CITY OF WOODLAND
