Purpose:

2 A good mulch can conserve water by significantly reducing moisture evaporation from the soil. Mulch also reduces weed populations, prevents soil compaction, and keeps soil temperatures more moderate. The State Save Our Water Project estimates that mulch can save 20 to 30 gallons of water per 1,000 square feet each time you run irrigation. In addition, mulching is one of the steps when converting turf to water-wise landscaping.

Rebate Applicant Information

3 The mulch rebate allows for a maximum of \$100 per City of Woodland fiscal year (July 1 – June 30).

Eligibility:

4 **The residential or commercial property owner or tenant of property with the permission of the owner with an active and up-to-date City of Woodland utility account is eligible for a Mulch Rebate.**

- The program begins on **July 1, 2014**. Only mulch purchased after this date will be eligible for a rebate.
- Only **plant-based mulch** (e.g., bark, wood chips, hulls) is eligible for the rebate.
- Applications must be received within 90 days of purchase. All rebates are funded first-come, first-serve. Fund availability is not guaranteed. **Mulch must be installed before rebate will be given.**
- Rebates will be in an amount equal to the purchase price or \$100, whichever is less.
- Mulch must be installed to a minimum three-inch depth.
- Mulch is subject to random inspection by City of Woodland.
- Allow City of Woodland to reference this project and use photographs in outreach materials.

City of Woodland does not guarantee that installed mulch will result in reduced water usage or in cost savings.
