

Argument in Favor Of Measure F

YES ON MEASURE F.

A YES vote will reauthorize an EXISTING ½- cent sales tax to continue to fund vital community needs including street and road maintenance, parks facilities and capital projects and public safety.

A YES vote on F will NOT result in any increase in taxes. The ½-cent sales tax is already being collected, and has been since 2000. Measure F will merely extend the sunset of the existing ½-cent sales tax for an additional 12 years.

The continuation of the existing ½ cent sales tax will allow the city to augment funding available for much needed road repairs, and help pay-off the bonds used to construct the Community and Senior Center. Measure F will also continue to pay for ongoing maintenance and repairs of facilities in our community and neighborhood parks and at our public library, and will provide funding to supplement public safety staffing and improve response capabilities for police and fire calls for service.

Measure F will help the city sustain and expand services without the need to increase taxes by enhancing our investments in critical infrastructure and other programs supporting economic development - resulting in new jobs and increased revenues.

Woodlanders have a proud history of supporting our community and a willingness to pay for what we need - provided there is fiscal accountability. We will continue to receive a detailed spending plan and an annual report from the City on Measure F revenues collected and how these funds are being spent.

A YES vote means that we are taking an active role in protecting and improving our quality of life in Woodland.

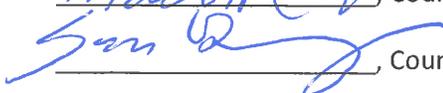

Please join us in voting YES on Measure F.
